This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf of a book. The paper has a slightly textured appearance with numerous small, dark brown spots (foxing or dirt) scattered across its surface. There are also some faint, illegible markings and smudges, particularly on the right side. The right edge of the page is slightly irregular, suggesting it is part of a bound volume.

Above is shown the functioning organization of the Coroner's Office for operation on a 24 hour per day, 7 day per week schedule. On the following pages are the approximations of the unit work load, calculated on the basis of the year 1957. This load changes little from year to year.

TOTAL BUDGET - YEAR JULY '57 to JULY '58 \$ 193,780.

POPULATION: 746,000.
COST PER CAPITA: .25¢

In evaluating cost per capita, note should be taken that cost of investigation, ambulance service, morgue facilities, janitorial service, etc., etc., are provided in this budget. Many jurisdictions having seemingly lower costs may be found to have these services provided by other agencies as police, county hospitals, works department, etc., but no less a public expense even if not showing on the Coroner's budget. Further allowance should be made for the relative standards of practise as reflected in the number of autopsies performed in relation to the total deaths in the community.

Above is shown the functioning organization of the Coroner's Office for operation on a 24 hour per day, 7 day per week schedule. On the following pages are the approximations of the unit work load, calculated on the basis of the year 1957. This load changes little from year to year.

TOTAL BUDGET - YEAR July '58 to July '59 \$202,046

POPULATION: 746,000
COST PER CAPITA: .25¢

In evaluating cost per capita, note should be taken that cost of investigation, ambulance service, morgue facilities, janitorial service, etc., etc., are provided in this budget. Many jurisdictions having seemingly lower costs may be found to have these services provided by other agencies as police, county hospitals, works department, etc., but no less, a public expense even if not showing on the Coroner's Budget. Further allowance should be made for the relative standards of practice as reflected in the number of autopsies performed in relation to the total deaths in the community.

MEDICAL

3 Autopsies performed
1 Pathologist
1 Forensic pathologist
1 Asst. Toxicologist
2 Lab. Technicians
2 Morgue attendants

2372 bodies were received and identified after autopsy prepared for burial or storage in our vault.

2734 specimens sent to pathology laboratory where microscopic examination made and findings dictated and typed.

6975 specimens to toxicology for chemical and other tests. Reports dictated and transcribed.

Approximately 175 appearances in court before Grand Jury by physicians staff.

Approximately 25 consultations with District Attorney and homicide inspectors.

INVESTIGATION

5 Investigators
5 Ambulance drivers

3750 cases investigated
Approximately 1330 trips by invest. and ambulance drivers to scene of death or home of witnesses

2372 bodies removed to morgue from home or hospital

1550 reports of circumstances of death dictated and transcribed in coroner's register books

Approximately 2400 records and reports of property found. Later accounted for and delivered or shipped to next of kin.

Approximately 1200 identification officer records, fingerprint records, etc.

LEGAL

1 Court reporter
1 Typist

306 Inquests

1176 Witnesses subpoenaed and testimony taken

397 Jurors subpoenaed
About 1,500 pages of transcript taken.

About 3,000 pages of transcript typed.

6 Manslaughter warrants issued by Coroner's office as a result of Juries' verdict.

CLERICAL
